RECYCLED FABRICS

The textile industry is responsible for approximately 20% of the world's water waste and 10% of all carbon emissions.

We can all play our part in reducing waste and helping to lower emissions. That is why we are introducing a selection of recycled fabrics using PET yarns to our product ranges.

In doing this, we are helping to close the gap between raw materials and recycling.

WHY HAVE WE CHOSEN PET?

- Repurposes waste ✓
- Reduces energy and water consumption ✓
- Reduces carbon footprint ✓
- PET yarn is versatile, giving a high value product ✓
