

## ALL ABOUT THE TECHNICAL DETAIL

- All wood types are subjected to a 6 month drying process, to ensure it will cope with the environment or humidity in the final installation. This will lessen the possibility of warping in any of our shutter panels.
- All products are installed or reinforced, engineered stiles to increase stability and reduce any warping or twisting. This means the core of the stile is made with layered wooden veneer and opposing grain – super strong.
- UV inhibitors are used on all products to maintain the depth of your chosen colour for longer.

- The joints on all shutter types are professional (and look good) mortice and tenon joints for increased panel stability.
- Even the tilt rod staples we use are made from high grade stainless steel to ensure they won't rust and are installed with friction-reducing adhesive to maximise their holding power in situ.
- Every part of our manufacturing process is checked and double-checked to deliver high quality, beautiful shutters time and time again – for your peace of mind.
- All our shutters have a 3 years warranty from the manufacturer for structural defects or issues with any hardware of colour fastness.

**MAKE A STYLE STATEMENT**

with timeless window shutters from your local shutter specialist

## ABOUT US

- Be rest assured that we have a well established reputation for being the most respected Shutter Specialist in your area.
- We have expert technical knowledge and superb customer support.
- We're passionate about service and quality.
- We're partnered with a national market leader in shutter supply.

## ABOUT OUR SHUTTERS

- Your window will be better dressed from our custom made shutter range.
- Beautifully designed shutters will enhance the aesthetic of any window or outlook, whilst being able to control the light and improve insulation.
- Easy maintenance and quick to keep clean.
- Your chosen shutter will be made-to-measure to your exact specifications, with all parts being hand crafted to your window sizes and design.
- We have a beautifully displayed range of colour and door style samples to help you decide what combination is best for you.
- Shutters have no operating cords so compliant with the child-safety law.

## ABOUT OUR RANGE

- We have a comprehensive selection of wood types available; from smooth on-trend painted finishes to beautiful natural wood grains.
- When it comes to colours, the world is your oyster. Choose from our collection of specially selected popular shades or colour match with your favourite paint tone.
- Shutter styles are available for any window design with a choice of louvre widths and door configurations to suit your requirements.
- We have an extensive choice of frame options for all window types – the largest in the market.
- All our wood is responsibly sourced from reliable, known suppliers so that it can be managed and controlled throughout it's manufacturing process.
